

HCA Study Day

Course Description

This interactive workshop aims to provide core knowledge for Health Care Assistants working within a community or residential/nursing home setting. It aims to explore the issues and challenges relating to the practical application of person centred palliative care towards the end of life.

Contents include:-

- Understanding cancer and other life limiting illnesses
- What is Palliative Care?
- Communication Skills
- Recognising end of life
- Symptom control

Learning Outcome

By the end of the workshop you will be able to :-

- Define what is meant by Palliative Care
- Recognise when a person is reaching the end of life.
- Describe basic management of pain and symptom control
- Communicate effectively with patients and families
- Examine your own role and responsibilities around palliative care
